The New Rules for...

GETTING A STRONG RAISE or BONUS

The rules of getting a raise have changed. No longer can the strong performers simply sit back and expect a solid raise. They need to seek it with a powerful, innovative approach.

Competition in the workplace is getting tougher, and more often than not, the real money is closely guarded and reserved for those at the top. The pay gap between CEO's and average workers becomes larger every year. Truth is, for the workers, the odds are stacked against them. And what they don't know *really can hurt them*.

While almost every company will tell their employees that yearly raises are capped at 1 - 3%. Most companies have retention funds for high value employees. That is what top performers need to tap into. RaiseRequest letters can help to do just that.

To receive your share of the pie, you must demonstrate your strengths and show your performance by capturing, organizing, and documenting improvements you've made to substantiate the positive impact you've had on the organization. That is exactly what these letters enable you to do. This is a *powerful weapon* to put into your income-building arsenal.
